

PC spray stakes

Pressure Compensated

For all mini-spray nursery and greenhouse applications

- Pressure compensated flow ensuring constant flow rate at varying inlet pressures.
- UV resistant resin to provide years of trouble-free service.
- Uniform water and nutrient distribution.
- Optional CNL (anti drain system). When pressure in the pipes drops (after valves shut off at the end of an irrigation cycle) and the desired pressure is achieved, the CNL mechanism closes the water passage. The pipes remain full of water and ready for the next cycle.

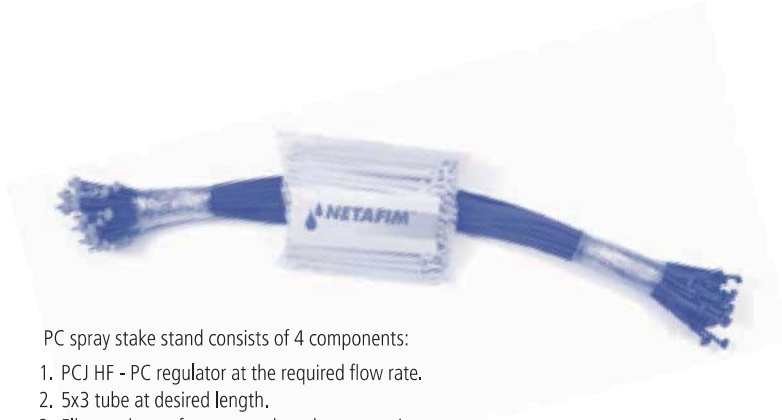

PC SPRAY STAKES

Nominal flow rate (l/h)*	Spray stake Color code	Spread description	Average wetted radius (m.)**	Flow regulator code color
12	Fuchsia	One side	0.22-0.25	fuchsia + black
20	Gray	One side	0.22-0.25	orange + black
20	Light gray	Two sides	0.22-0.25	orange + black

40	Blue	One side	0.22-0.25	orange + blue
40	Light blue	Two sides	0.22-0.25	orange + blue

* Within pressure range 1.5-4.0 bar. (1.8-4.0 in the 40 l/h model).

** To each side, will change at different height of the spray head

SPRAY STAKES

PC spray stake stand consists of 4 components:

1. PCJ HF - PC regulator at the required flow rate.
2. 5x3 tube at desired length.
3. Elbow adaptor for spray stake-tube connection.
4. Spray stake with the desired spray pattern.

The above first 3 products are supplied pre-assembled. Once in the field, all that is left is to connect adaptor to spray stake, place the spray stake in desired position and height and irrigate.

Each spray stake is supplied with water flow blockage mechanism to function when a pot is sold and/or shifted from position to prevent water and fertilizer loss.
